Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE

WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Processing Notes

DATA FORMAT

The original data contained FILLER and PADDING variables that were removed by ICPSR. As a result, the column locations in the codebook and any ICPSR-released data product will have column locations that are not consistent with locations described in the User Guide.

UNDOCUMENTED CODES

Some continuous variables may have high and low values that fall outside of the valid range for that variable. These values were not labeled.

Some categorical variables in this data collection contain undocumented codes, which may not be valid. Undocumented codes were not labeled by the Principle Investigators or ICPSR.

For a complete listing of valid codes, please refer to either the Basic CPS or Supplement Record Layout located in Attachment 6 and Attachment 7, respectively, of the User Guide.

VALUE LABELS

Value labels for some variables may be truncated. Please refer to Attachment 6 and Attachment 7 of the User Guide for complete value labels.

When not labeled, the -9, -3, -2, and -1 codes are designated as follows:

-9 NO RESPONSE

-3 REFUSED

-2 DON'T KNOW

-1 BLANK and/or OUT OF UNIVERSE

The value code **-1** is defined as **NOT ALLOCATED** for all ALLOCATION variables. Please refer to Attachment 15 of the User Guide for a complete listing of value labels for any ALLOCATION variable.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
